- Inductance measured at 100kHz, 0.1Vrms
- Isat1 : DC current at 25°C that causes the specified inductance drop from its value without current.
When Isat rating is less than Irms, Isat is the more critical specification.
- Irms : Current that causes a 40°C temperature rise from 25°C ambient. This information is for reference only and does not represent absolute maximum ratings.
- Ambient temperature -40°C to +85°C with (40°C rise) Irms current.
- Maximum part temperature +125°C (ambient + temp rise). Derating.
- Storage temperature Component: -40°C to +125°C.
